PROFESSIONAL SUMMARY

Dedicated full-stack developer with a strong passion for crafting innovative web applications. I specialize in React and Django, combining the power of both to build robust and user-friendly software solutions. With 6 years of experience in the software development industry, I've had the privilege to work on a diverse range of projects, from e-commerce platforms to data-driven web applications. I enjoy collaborating with cross-functional teams, bridging the gap between development and design, and contributing to a positive and productive work environment.

WORK EXPERIENCE

Full Stack Developer
Alltrue.AI • Vancouver

Jul 2024 - Present

- **End-to-End Feature Development:** Owned full-stack feature development, building and maintaining both frontend user interfaces and backend logic for production-grade web applications in close collaboration with product and design teams.
- **UI & UX Improvements:** Implemented and refined responsive interfaces, tables, dialogs, and detail views, improving usability, visual consistency, and interaction flows.
- **Data Integrity & Reliability:** Improved system robustness by fixing edge cases, cleaning up orphaned data, and preventing inconsistent or stale application states.
- **API & Integration Work:** Integrated frontend components with GraphQL and REST APIs, updating endpoints and services to support new features and evolving data models.
- **Code Quality & Maintainability:** Refactored existing code, improved typing and structure, reviewed pull requests, and contributed to a cleaner, more maintainable codebase in an Agile environment.
- **Tools I have used:** Flask, AWS Services, NextJS, Typescript, SQL, GraphQL

Senior Full Stack Developer
Sell2Rent • Florida

Mar 2024 - Present

- **Transform Designs into Reality:** Work closely with our design team to convert pixel-perfect designs from Figma into interactive, responsive web applications using ReactJS and CSS.
- **Feature Development:** Collaborate with our backend team to add and enhance features on our NodeJS platform, ensuring robust and scalable solutions.
- **Optimize Website Performance:** Drive significant improvements in our website's SEO metrics and overall performance, aiming for a 60% enhancement in speed and search engine rankings.
- **Conduct Live Coding Interviews:** Participate in our hiring process by grading and evaluating prospective candidates through live coding interviews, ensuring we bring top talent into the team.

Full Stack Developer
Telconet • Guayaquil, Ecuador

Jun 2022 - May 2024

- **Innovative Mobile App Features:** Developed and implemented new functionalities for a mobile app (Android Java) used by technicians to install internet services in residential and commercial locations. My contributions have enhanced the app's usability and functionality, streamlining the installation process of the services that company has to offer.
- **Efficient Bug Resolution:** Expertise in identifying and fixing bugs across mobile apps, backend, front end systems and DataBases (Oracle). My proactive approach ensures consistent performance and reliability across all platforms.
- **Dynamic Web Application Development:** Created new features for a web-based management tool using PHP (Symfony), Spring Boot and JavaScript. This tool is crucial for managing daily installations and my enhancements have improved its efficiency and user experience.

Full Stack Developer

Mar 2021 - May 2023

FUNIBER (ONG that provides online studies) • Barcelona, Spain

- **Development of Scientific Repositories:** Successfully created dockerized (Docker, Kubernetes) scientific repositories for all universities associated with FUNIBER. These repositories are accessible at <https://repositorio.uneatlantico.es>, <https://repositorio.unini.edu.mx>, <https://repositorio.unic.co.ao>. My efforts have provided these institutions with robust, reliable platforms for academic resource management and SEO ranking.
- **Automated and Scalable Network:** Engineered a network of scientific repositories that are independent and automatically scalable using GitLab CI/CD, Kubernetes, and Docker. This innovative solution ensures that repositories are consistently up-to-date, scalable, and capable of handling growing data volumes efficiently.
- **Automation Scripts:** Developed JOBS scripts (Flask) to automate processes between universities, streamlining workflows and enhancing collaboration across institutions. This automation has significantly reduced manual effort and increased operational efficiency.
- **Data Science Expertise:** Applied advanced data science techniques (Python) in the field of lead scoring. Conducted feature engineering, model training, testing, and accuracy improvement using both custom models and Google Cloud's Vertex AI. My work has led to more accurate and reliable lead scoring, contributing to better decision-making and strategic planning.

Full Stack Developer

Aug 2020 - Oct 2021

Hangaroa S.A. (Company that builds IT solutions to Ecuador StartUps) • Guayaquil, Ecuador

- **Startup Application Development:** Successfully created and launched various startup applications, showcasing my ability to deliver end-to-end solutions. Notable projects include:
 - TransporterBackend <https://github.com/axelauza97/TransporterBackend>
 - Vehicular <https://github.com/JordyM97/Vehicular>
- **Feature Integration and Enhancement:** Integrate new features into existing startup applications, improving functionality and user experience. My enhancements have helped these apps better serve their intended purposes and users.
- **Bug Fixing and Maintenance:** Identify and resolve bugs across multiple applications, ensuring smooth performance and reliability.
- Projects I have contributed to include:
 - TOME-Proveedor (<https://github.com/Software1-TOME/TOME-Proveedor>)
 - TOME-Solicitante (<https://github.com/Software1-TOME/TOME-SOLICITANTE>)

- CabutoFront (<https://github.com/CabutoMarket/CabutoFront>)
- Italian-Deli-Angular (<https://github.com/juanjofs96/italian-deli-angular>)
- **Backend Development with Django:** Developed a backend system hosted on PythonAnywhere using Django, demonstrating my capability to build robust server-side applications that support various frontend technologies.

Investigation Assistant Oct 2019 - Mar 2020

CIDIS (ESPOL) • Guayaquil, Ecuador

- **Django Backend Development:** Successfully developed a Django-based backend system for an investigation project management webpage. This project streamlined the organization and tracking of research activities, enhancing productivity and collaboration among team members.
- **Banana Dataset Creation:** Led the creation of a detailed banana dataset using multispectral cameras. This dataset has been instrumental in various research and analysis projects, providing valuable insights through advanced imaging techniques.

Investigation Assistant

Jun 2019 - Jan 2020

CIDIS (ESPOL) • Guayaquil, Ecuador

- **Simulation Environment Creation:** Successfully created and configured an environment in the CARLA Simulator for dataset construction, enabling the generation of high-quality, realistic data for various research and development projects.
 - <https://github.com/axelauza97/CARLA-SIMULATOR>

EDUCATION

Post-Secondary Diploma Full-Stack Web Development

Jul 2024 - Present

Canadian College of Technology and Business (CCTB) • Vancouver

Engineer in computer science

Feb 2017 - Feb 2021

Escuela Superior Politécnica del Litoral (ESPOL) • Guayaquil, Ecuador

SKILLS

- HTML/CSS/JS
- React JS / React Native/ Angular / Bootstrap /JQuery
- Django / NodeJS / Flask
- Python
- Java /Spring Boot / Android Apps
- MySQL
- SQL Server
- C
- Computer Vision
- Artificial Intelligence
- Google Cloud Platform
- GIT / GITLAB
